for nature tomorrow

English Nature Research Report

No. 42

An ancient woodland bibliography

C Watkins

This work was carried out for Dr G F Peterken under the Commissioned Research Programme of the Nature Conservancy Council.

ISSN 0967-876X

Preface

Charles Watkins produced the first of the trilogy of books on ancient woodland that were sponsored by ESSO and published by David and Charles. As part of this work he produced a bibliography of woodland references. I hope that this can be transferred to the library's STATUS system. Many of the references are in his book, but not all. Therefore I am distributing the bibliography as an English Nature Research Report. I hope you find it useful.
