APPENDICES

APPENDIX A - River-related macrophyte species listed in citations of notified SSSIs and proposed SSSIs (pSSSIs).

APPENDIX A continued

APPENDIX A continued

APPENDIX A continued

APPENDIX A continued

APPENDIX A continued

Notes:

+	Species listed in the Wildlife and Countryside Act (1981 and subsequent amendments)
*	Reported as dominant species in certain reaches
1	Notified as an SSSI on 4 February 1993
2	Brackish water species
Wen	River Wensum
Coq	River Coquet
Der/Cok	Rivers Derwent/Cocker
Edn	River Eden
Tem	River Teme
Tes	River Test
Itc	River Itchen
Beu	River Beult
Bar	River Barle
Lug	River Lugg
Lym	Lymington River
Axe	Lower River Axe
K/L	Rivers Kennet and Lambourn
Avn	River Avon
Frm	River Frome
Old	Old Bedford/Ouse Washes
Nar	River Nar
Ise	River Ise
Rib	River Ribble
Eye	River Eye
Bly	River Blythe
Arn	Arun Banks
Cml	Cornmill Stream and Old River Lea
Fra	Frays River
Ber	Bere Stream
Mor	Moors River
Hul	River Hull headwaters
Wha	River Wharfe

Species lists were not available or included in the citations for the proposed SSSIs of the Rivers Tove and De Lank and notified SSSIs of the Malham/Arncliffe Streams, and the Rivers Barle, Lathkill, Loddon and Wye. The species list for the River Frays is based on that from Fray's Farm Meadows

APPENDIX B – Sites with significant temporal differences in SRP concentrations.

Values are the mean (in mg l⁻¹) of each time step.

B.1 Level of statistical significance set at 99% (p=0.01)

REGION (River)	SITE	1980	1981	1982	1983	1984	1985	1986	1987	1988	1989

Test statistic is observed 't' value divided by the critical 't' value. Values above unity indicate a significant trend at the 95% level of significance, with the highest values being the most significant.

+ Initial and final concentrations over a ten year time period estimated from the linear least squares regression line produced by Garland (1991).

Codes in parenthesis are the inferred achieved EN target levels at each site at the beginning and end of the time series.

APPENDIX D - Water quality and macrophyte site pairings for water quality sites with significant temporal differences in SRP concentration.

Sites in bold were rejected since they did not comply with the stated selection criteria (see Section 5.3).

Region (River)	Water quality site	NGR	Macrophyte site NGR	Survey date	Surveyor	Inter-site distance (km)	Comments on pairing
