Name(s)

WINDY NOOK

County(s)

Tyne and Wear

Grid. Ref.

NZ2760

Grade

?

Status

Public Authority

Site description - Habitat

Area of rough grassland with a pond managed as an urban nature park. Good variety of wayside herbs with hawthorn scrub and recently planted trees.

Invertebrate Interest - Coverage

Noel Jackson has recorded a variety of insects and other invertebrates. Mick Eyre found the notable weevil Apion pallipes, this is usually a woodland species which feeds on Dogs Mercury.

Comments - Conservation

Valuable educational resource given its location in the middle of Gateshead.

Red Data Book and Notable species recorded for WINDY NOOK
