## AGRICULTURAL LAND CLASSIFICATION REPORT FOR RUGBY LOCAL PLAN, LOWER LODGE FARM

### 1 SUMMARY

1.1 The Agricultural Land Classification (ALC) Survey for this site shows that the following proportions of ALC grades are present:

Grade/Subgrade	ha	% of site
3a	17.9	14
3b	98.5	75
Other land		
Agricultural buildings	0.5	0.5
Woodland	7.8	6
Non-Agricultural	2.6	2
Urban	0.5	0.5
Not Surveyed	2.8	2.0

1.2 The main limitation to the agricultural use of land in Subgrade 3a is soil wetness.

1.3 The main limitation to the agricultural use of land in Subgrade 3b is soil wetness.

### 2 INTRODUCTION

2.1 The site was surveyed by the Resource Planning Team in September 1994. An Agricultural Land Classification survey was undertaken according to the guidelines laid down in the "Agricultural Land Classification of England and Wales - Revised Guidelines and Criteria for Grading the Quality of Agricultural Land" (MAFF 1988).

2.2 The 130.6 ha site is situated to the north of Rugby and is centred upon Lower Lodge Farm (SP509783). The site is bounded by the M6 to the north and the A426 to the east. The land to the north, east and west of the site is predominantly in agricultural use, the land to the south is in non-agricultural and urban use.

2.3 The survey was requested by MAFF in connection with the Rugby Local Plan.

2.4 At MAFF Land Use Planning Unit's request this was a detailed grid survey at 1:10000 with a minimum auger boring density of 1 per hectare. The attached map is only accurate at the base map scale and any enlargement would be misleading.

2.5 At the time of the survey the site was under grass and cereals.

### 3 CLIMATE

3.1 The following interpolated data are relevant for the site (SP 508784):

Average Annual Rainfall (mm)	687
Accumulated Temperature above 0°C January to June (day °C)	1356

3.2 There is no overall climatic limitation on the site

3.3 Other relevant data for classifying land include:

Field Capacity Days (days)	158
Moisture Deficit Wheat (mm)	97
Moisture Deficit Potatoes (mm)	86

### 4 SITE

4.1 Three site factors of gradient, micro relief and flooding are considered when classifying land.

4.2 Gradient imposes a limitation to Subgrade 3b (7° to 11°) in the vicinity of Brownsover Hall Hotel, Lower Lodge Farm and Oak Spinney.

4.3 Micro relief and flooding do not impose any limitations on the agricultural use of the land.

### 5 GEOLOGY AND SOILS

5.1 The solid geology of the area is comprised of Jurassic Lower Lias Clays and Cement Stones - British Geological Survey Sheet 169 Coventry 1 Inch. This is overlain with deposits of Quaternary boulder clay.

5.2 The underlying geology influences the soils which have a clay loam texture.

**AGRICULTURAL LAND CLASSIFICATION  
RUGBY LOCAL PLAN, LOWER LODGE FARM**

**CORRIGENDA**

Para 6.1.1, last line - delete ' IV ' and insert ' III '.

## 6 AGRICULTURAL LAND CLASSIFICATION

6.1 Subgrade 3a - occupies 17.9 ha (14%) of the survey area and is found in the north west and east of the site.

6.1.1 The soil typically has a medium clay loam or sandy clay loam texture over heavy clay loam and clay to depth, with few stones within the profile. Observations of gleying and the depth to the slowly permeable layer place these soils in Wetness Class ~~IV~~. Subsoils may occasionally contain chalky fragments.

~~III~~ MD) TYPOGRAPHICAL ERROR

6.1.2 The main limitation to the agricultural use is soil wetness.

6.2 Subgrade 3b - occupies 98.5 ha (75%) of the survey area and is found over the majority of the site.

6.2.1 The soil typically has heavy clay loam texture overlying clay to depth. Observations of gleying and the depth to the slowly permeable layer place these soils in Wetness Class IV. Subsoils may occasionally contain chalk fragments.

6.2.2 The main limitation to the agricultural use of this land is soil wetness.

6.3 Other land includes agricultural buildings which occupy 0.5 ha (0.5 %) of the survey area at Lower Lodge Farm; woodland - occupying 7.8 ha (6%) of the survey area; non-agricultural land covering 2.6 ha (2%) of the survey area near Brownsover Hall Hotel and urban - covering 0.5 ha (0.5%) of the survey area as a road and housing in the east of the site. The remainder of the land at Brownsover Hall (2.8 ha - 2%) was not surveyed.

#### 6.4 SUMMARY OF AGRICULTURAL LAND CLASSIFICATION GRADES

Grade/Sub-grade	Area in Hectares	% of Survey Area	% of Agricultural Land
3a	17.9	14	15
3b	98.5	75	85
Other land			
Agricultural Buildings	0.5	0.5	-
Woodland	7.8	6	-
Non-Agricultural	2.6	2	-
Urban	0.5	0.5	-
Not Surveyed	2.8	2	-
