SECTION 1- INTRODUCTION AND GENERAL COMMENTS

Introduction

The Foreword and General Introduction found within the Ancient Woodland Inventory county reports (English Nature, 1985-95) explain that the inventory is provisional. This indicates that revisions concerning ancient status or changes as a result of forestry practices or other developments need to be incorporated into the inventory when they are brought to the attention of English Nature.

This report provides details of those amendments which have been made to the ancient woodland inventory county reports between the 29 February 1996 and 4 February 1997. Sources of information for these revisions have included recent English Nature, Local Authority and Wildlife Trust surveys along with comments on particular sites from the Forestry Commission and woodland owners or their agents. Woods are listed in Table 1 where changes or amendments made between the above period affect either the provisional county reports and their associated printouts (1985-1995), or supersede the amendments report No 72 (Thomas & Philips, 1994) or No 177 (Isaac & Reid, 1996).

Appendix 1 lists the current editions of the county inventories to which these amendments refer. Holders of county inventories are invited to amend their own copies in accordance with the details given in Table 1. The layout of this amendment report is similar to the 1994-1996 report (Isaac & Reid, 1996) and shows site details, the type and reason for an amendment and the altered details (both previous and present). Definitions of the terms and abbreviations used in Table 1 are given on pages 2, 3 and 6. Where further information is required, reference can be made to the introduction in the county ancient woodland inventory reports and associated printouts. Clarification of the amended boundaries of individual sites can also be obtained from English Nature at Peterborough (Woodlands Section, Lowlands Team).

Table 2 illustrates the area of ancient woodland listed by county at February 1997. These figures update those published in Spencer and Kirby (1992), Isaac & Reid (1996) or found in the individual county reports printouts. Where the figures have altered from those published in the last Amendment Report No 177 (Isaac & Reid, 1996), these are shown in Table 2 for comparison. From this table it would appear that the area of ancient woodland and cleared area within England have increased since 1996, while the area of semi-natural woodland has decreased. However, this may not be recording an actual change in the woodland cover, only the improvement and refinement of existing data. Only seven of the counties listed have any alterations to their total area figures. Changes to the Surrey figures result mostly from amendments that were highlighted during recent survey work carried out by the Surrey Wildlife Trust in preparation for the proposed revised Surrey Ancient Woodland Inventory.

Amendments

The types and reasons for amendments fall into a number of different main groups. Some of the comments used under "Amendments: Reasons" and "Amendments:Types" in Table 1 are further explained below:

Constat/Consarea

Constat indicates the conservation status of the site (such as SSSI, NNR, County Trust Reserve, Woodland Trust Reserve, RSPB Reserve etc). From the Consarea (total area contained within all the conservation designations) and Consarea2 (the semi-natural component of Consarea) figures it is possible to see if the designation applies to a part or all of the site. An addition or deletion of a

conservation status as listed below, may or may not result in a change in Consarea/Consarea2, as it depends on the size and presence of other designations on the site.

SSSI notified/denotified

Changes in conservation status or 'constat' (SSSI notifications or denotifications) which have either taken place or where further details have become available since the Amendment Report No.177 (Isaac & Reid, 1996) was published, have been incorporated in this report. SSSI's that are notified only for their geological importance are not recorded in the ancient woodland database.

SSSI renamed

The name of some SSSI's have changed, but the conservation area will only alter where the site has been renamed and incorporated within another SSSI or become amalgamated.

SSSI changed

Both the name and the area of the SSSI have changed upon re-notification.

NNR designation

Ancient woodland sites within Wistman's Wood and Black Tor Copse now have NNR status.

WT Reserve

Nature Reserves owned by the Woodland Trust have been incorporated into the inventory, based on information in the *1996 Directory of Woodland Trust Properties* (The Woodland Trust, 1996). Continuing amendments arising from this directory and other information that becomes available will be added to the inventory and will occur in future amendment reports.

New sites

Recent field investigations and other forms of surveys have highlighted new sites that were suitable for inclusion or re-instatement.

Deleted/part deleted

Sites have been deleted or part deleted from the inventory when evidence suggests that all or part of the site is of recent origin and not ancient. Sites that have been accurately measured and found to be below the 2 ha minimum threshold have also been deleted.

Areas remeasured

Following Surrey Wildlife Trust's recent survey work, a considerable amount of ancient woodland in Surrey has been rechecked, remeasured and details amended accordingly. Alterations made to either the original details in the 1988 Surrey Inventory or previous Amendment Reports have been listed in Table 1. The 1988 edition of the Surrey AWI is to be revised this year, incorporating all these changes.

Improvement in information quality

This type of amendment indicates changes in the quality of information used to judge whether a wood was semi-natural or not and how certain English Nature is that the site is ancient.

Errors

Where measurement or mapping errors have become evident, amendments have been made.

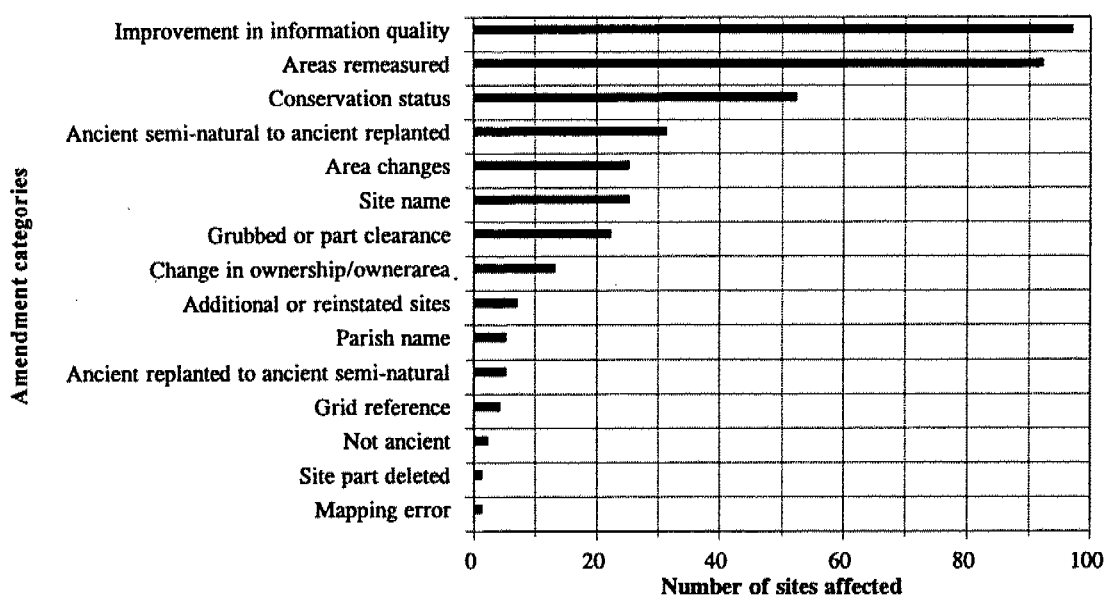

Owner/Ownerarea

Information on ownership is only recorded if the site is owned or leased by a conservation body, National Trust and other public organisation. Where the site has such an owner, the area contained in that ownership is listed. Occasionally there may be no change in owner but an alteration is made to the ownerarea. This occurs if part of the site has been sold or ownership has been extended or if errors or new information on the areas becomes available.

The main type of amendments listed in Table 1 have been summarised into fifteen amendment categories (Figure 1). From this list the four largest categories were areas remeasured, improvement in the quality of information, conservation status and ancient semi-natural woodland being changed to ancient replanted.

Figure 1- Amendment Types

29 February 1996 to 4 February 1997

The resurvey of ancient woodland in Surrey accounts for the majority of the amendments and especially those relating to the improvement of information quality, areas remeasured and changes from ancient semi-natural to ancient replanted. Figure 1 does not include ancient semi-natural woodland lost to ancient replanted if changes are only due to differences that have occurred following remeasurement and not actual changes. The majority of sites affected by grubbing or change in grubbed area occur in Surrey and are a result of remeasurement and new information coming to light.

Outside Surrey, change to conservation status (often as a result of notification of river SSSIs), is the most common type of amendment. For eighteen counties no amendments were recorded within the specified period.

Future revisions

The inventories remain provisional. Further studies need to be carried out to progressively refine our knowledge of the extent and distribution of ancient woodland in England. Changes may still be needed to some of those sites included in this report. It is planned that both the Ancient Woodland Inventories for Surrey and Herefordshire will be revised later this year. These revised inventories will incorporate all changes that have taken place since they were first published and include all alterations listed in this and other Amendment Reports.

The Forestry Authority and English Nature are currently carrying out a joint project digitising all the boundaries of ancient woodland in England. Several local authorities have already digitised ancient woodland boundaries and where these data sets are available and in a suitable format, they are being used. The digitised data are captured at 1:25,000 scale and will in future enable the inventory information to be better manipulated and analysed. It is expected that this will probably result in a large number of changes especially in connection with the area figures presently included in the inventories.

Information on disposals of Forest Enterprise land in the South and West have still to be obtained and will be incorporated as soon as they are available.

Comments on known alterations to individual sites are welcomed and all information as detailed on pages 24 & 25 should be included on the standard form (see Appendix 2) and sent to Woodlands Section, Lowlands Team, English Nature, at the address below. For large data sets a different approach may be needed to incorporate any changes and we will be pleased to discuss this as necessary.

Acknowledgements

The changes detailed here could not have been incorporated without the help of a large number of people from conservation and forestry organisations, woodland owners and local government. We would like to take the opportunity to express our thanks for the assistance received from these persons and organisations.

SECTION 2- TABLES

List of abbreviations and notes relating to Table 1

All amendments are listed by County, Ten km square and Grid reference, and cover site details, type and reason for amendment together with the details that have altered. Due to page layout constraints, certain abbreviations to the text have had to be made. Further explanation to these items are given below while general comments on amendments-types and reasons can be found on pages 1 & 2.

| | | |
|--|-----------------------|---|
| SITE DETAILS | GRID REF | Six figure grid reference to the centre of the inventory site, not always to the centre of the existing wood. |
| | NAME | Name of site. (/ , /+ , and " " are standard Ancient Woodland Inventory conventions) |
| AMENDMENTS-TYPE | constat | Conservation status of the site. |
| | consarea | Total area with conservation status. |
| | owner | Site owner; only conservation organisations, and other public organisations are recorded. |
| | ownerarea | Area contained within that ownership. |
| | snownerarea | Semi-natural element of the ownerarea. |
| | snarea | Area of the site which is semi-natural. |
| | plarea | Area of the site that has been replanted. |
| AMENDMENTS-REASON | LNR | Local Nature Reserve. |
| | NNR | National Nature Reserve. |
| | new info | new information. |
| | SSSI | Sites of Special Scientific Interest. |
| ALTERED DETAILS- PREVIOUS & PRESENT | CL | Area that has been grubbed or cleared since the first series 1:25,000 was compiled. |
| | (Agric/Urban/Mineral) | Area lost to agriculture, urban or mineral workings. |
| | Cons | Consarea- total area with conservation status. |
| | Cons2 | Consarea2- semi-natural component of the consarea. |
| | Cons=0 | No conservation designations exist on site. |
| | EX | Existing area of the site. |
| | FC | Forestry Commission. |
| | NNR | National Nature Reserve. |
| | OS | Area of the wood on the first series 1:25,000 maps. |
| | Own | Ownerarea (as defined above). |
| | PL | Area of the site that has been replanted. |
| | SN | Area of the site that is semi-natural. |
| | Snown | Snownerarea- semi-natural element of ownerarea. |
| | Snstat | Snstatarea- semi-natural element within each conservation status. |
| | SSSI | Sites of Special Scientific Interest. |
| | Stat | Statarea- area within each conservation status. |
| | Uncert= +/0/- | An indication of how certain English Nature was that the site is ancient. |
| | Uncert2= +/0/- | Quality of information used to judge whether a site was ancient or recent. |
| | WT | Woodland Trust. |
| | ~ | Information not available or unknown. |

Table 2 -Summary figures for ancient woodland in England, at February 1997

The figure in brackets represents the areas in February 1996 as published in the Amendments Report ENRR 177 and is only shown where a subsequent change has occurred.

The changes are the result of sites being added, omitted, areas remeasured or amended.

| County | February 1997 | | |
|-----------------------------|-------------------------------|--|--------------------------------|
| | Area of ancient woodland (ha) | Area of ancient semi-natural woodland (ha) | Area cleared since c 1920 (ha) |
| Avon | 3069 | 2319 | 115 |
| Bedfordshire | 2636 | 1516 | 202 |
| Berkshire | 5519 | 3735 | 497 |
| Buckinghamshire | 8715 | 4829 | 330 |

SECTION 3- APPENDICES

Appendix 1- Current editions of county inventories

| Date | Counties |
|------|--|
| 1986 | Cornwall, Devon, Herefordshire*, London, Somerset, South Yorkshire, Worcestershire. |
| 1987 | Bedfordshire, Cambridgeshire, Cleveland, Durham, Isle of Wight, Tyne & Wear, Wiltshire. |
| 1988 | Avon, Cheshire, Dorset, Greater Manchester & Merseyside, Hertfordshire, Lincolnshire, Northamptonshire, Northumberland, Shropshire, Surrey*. |
| 1989 | East Sussex, Humberside, Warwickshire, West Midlands, West Sussex. |
| 1990 | Leicestershire, Nottinghamshire. |
| 1991 | Gloucester. |
| 1992 | Derbyshire, Essex, Norfolk, Suffolk. |
| 1993 | Staffordshire. |
| 1994 | Cumbria, Hampshire, Kent, Lancashire, North Yorkshire (Part 1-3), West Yorkshire. |
| 1995 | Berkshire, Buckinghamshire, Oxfordshire. |

* New revised editions of these inventories are planned to be published in 1997 and will incorporate all amendments made since their original publication.

Appendix 3- Ancient Woodland Inventory Alterations Form with explanatory notes

Explanatory Notes

The Ancient Woodland Inventory (AWI) are provisional because new information (historical evidence or actual changes) may result in amendments needing to be made. To ensure that the inventory remains as accurate as possible it is important that errors are identified and amendments recorded. These notes together with the attached form, have been prepared to ensure that all the information necessary to make the changes is supplied.

- | | | | | | | | | | | |
|---------------------|--|--|---------------------|--|--------------------|--|--|-------------------------------|---------------|--|
| 1. | Name of wood | Give name as listed on OS map or local/historic name, if known. | | | | | | | | |
| 2. | County | State county in which the wood lies. If the wood crosses several county boundaries state all relevant counties. | | | | | | | | |
| 3. | National Grid Reference | Give full grid reference either as shown on the inventory print out or at the centre point of wood. | | | | | | | | |
| 4. | Information required for a new addition to the inventory | <p>If the wood and evidence indicates that the site is ancient, details of its area (in hectares) are required for the following items:</p> <table border="0" style="width: 100%;"> <tr> <td style="width: 50%; vertical-align: top;">Total area-</td> <td style="width: 50%; vertical-align: top;">Area of the proposed new site.</td> </tr> <tr> <td style="vertical-align: top;">Semi-natural area-</td> <td style="vertical-align: top;">Area of the site that is semi-natural.</td> </tr> <tr> <td style="vertical-align: top;">Replanted area-</td> <td style="vertical-align: top;">Area that has been replanted.</td> </tr> <tr> <td style="vertical-align: top;">Area cleared-</td> <td style="vertical-align: top;">Only noted if clearance has taken place since the relevant 1st Series OS 1:25,000 map was compiled. The reason for the loss, such as agriculture, urban development or mineral extraction, should be stated.</td> </tr> </table> | Total area- | Area of the proposed new site. | Semi-natural area- | Area of the site that is semi-natural. | Replanted area- | Area that has been replanted. | Area cleared- | Only noted if clearance has taken place since the relevant 1st Series OS 1:25,000 map was compiled. The reason for the loss, such as agriculture, urban development or mineral extraction, should be stated. |
| Total area- | Area of the proposed new site. | | | | | | | | | |
| Semi-natural area- | Area of the site that is semi-natural. | | | | | | | | | |
| Replanted area- | Area that has been replanted. | | | | | | | | | |
| Area cleared- | Only noted if clearance has taken place since the relevant 1st Series OS 1:25,000 map was compiled. The reason for the loss, such as agriculture, urban development or mineral extraction, should be stated. | | | | | | | | | |
| 5. | Reasons why a wood should be added to the inventory | <table border="0" style="width: 100%;"> <tr> <td style="width: 33%; vertical-align: top;">Historical evidence</td> <td style="width: 33%; vertical-align: top;">Give details of maps, plans, photographic or other evidence used and provide copies if possible.</td> <td style="width: 34%;"></td> </tr> <tr> <td style="vertical-align: top;">Field survey</td> <td style="vertical-align: top;">Give details of any surveys, dates and findings. If possible provide a copy of any survey information.</td> <td></td> </tr> </table> | Historical evidence | Give details of maps, plans, photographic or other evidence used and provide copies if possible. | | Field survey | Give details of any surveys, dates and findings. If possible provide a copy of any survey information. | | | |
| Historical evidence | Give details of maps, plans, photographic or other evidence used and provide copies if possible. | | | | | | | | | |
| Field survey | Give details of any surveys, dates and findings. If possible provide a copy of any survey information. | | | | | | | | | |
| 6. | Alterations to a wood listed in the inventory. | <p>Alterations may include all or part of the site being wrongly classified as ancient or changes in area measurements, parish or site name, conservation status or ownership. It would be useful to differentiate between changes that are a result of the wood being previously wrongly recorded and those that have occurred since the inventory was produced. As listed for (4), details are required for the following items;</p> <table border="0" style="width: 100%;"> <tr> <td style="width: 50%; vertical-align: top;">Total area-</td> <td style="width: 50%; vertical-align: top;">Area of the site.</td> </tr> <tr> <td style="vertical-align: top;">Semi-natural area-</td> <td style="vertical-align: top;">Area of the site that is semi-natural.</td> </tr> <tr> <td style="vertical-align: top;">Replanted area-</td> <td style="vertical-align: top;">Area that has been replanted.</td> </tr> <tr> <td style="vertical-align: top;">Area cleared-</td> <td style="vertical-align: top;">Area of total clearance that has taken</td> </tr> </table> | Total area- | Area of the site. | Semi-natural area- | Area of the site that is semi-natural. | Replanted area- | Area that has been replanted. | Area cleared- | Area of total clearance that has taken |
| Total area- | Area of the site. | | | | | | | | | |
| Semi-natural area- | Area of the site that is semi-natural. | | | | | | | | | |
| Replanted area- | Area that has been replanted. | | | | | | | | | |
| Area cleared- | Area of total clearance that has taken | | | | | | | | | |

place on the site. State reason for the loss.

7. Reasons why the alteration to the AWI is necessary Provide historical and/or field evidence as described for item (5).
8. Provide sketch map Either provide a sketch map or annotated copy of an Ancient Woodland Inventory report map. Please ensure that the county, and a grid reference or location map is provided. This information is vital in helping to easily locate the site.
9. Name & Address The name, address and telephone number of whoever made the observations. Occasionally we may need to contact the person named, if further information or clarification of details on the form or site are needed.

.... STOP PRESS....

A new booklet "Guidelines for Identifying Ancient Woodland" is now available free of charge from English Nature, Peterborough. This booklet can be used to help discover the origins of a wood.

Ancient Woodland Inventory Alterations Form

1. Name of wood

2. County

3. National Grid Reference (eg SP640297)

4. Is this wood a new addition to the inventory? YES (see below) / NO (go on to 6.)
Remember - only continuous woodland blocks over 2 hectares in size can be included
Please give the following details if known (areas in hectares please):

- total area.....
- semi-natural area.....
- replanted area.....
- area cleared this century.....reason (agriculture/ urban/ mineral).....
- conservation status (eg SSSI, nature reserve etc).....
- owner (public bodies only).....

5. Please state why you think this wood should be added to the inventory? (eg historical evidence, field survey evidence) Continue overleaf if necessary

6. Alterations to an existing inventory wood
What has changed? (✓ those which apply, and give new details, where known - areas in hectares please)

- total area.....
- semi-natural area.....
- replanted area.....
- area cleared this century.....reason (agriculture/ urban/ mineral)
- conservation status (eg SSSI, nature reserve etc).....
- owner (public bodies only).....

7. Please state why you think these alterations are necessary (eg mistake in provisional inventory, new historical evidence, new field survey evidence) Continue overleaf if necessary

8. Please include a sketch map of the affected area (or annotate copy of AWI report maps)

Name..... Address..... Date.....
